SUMMARY

Third-year B.Tech student with a strong problem-solving foundation (750+ LeetCode problems) and three deployed full-stack applications. Hands-on experience building real-time features, authenticated REST APIs, and responsive UIs with React, Node.js, Express, MongoDB, and Socket.IO. Seeking a Software Engineering Internship to write clean, reliable code and grow within a large-scale engineering team.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning — Thakur College of Engineering & Technology, Mumbai University

CGPA: 7.95 (third year) | JEE Main: 81 percentile | MHT-CET: 91 percentile

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, HTML5, CSS3
Frontend	React.js, Redux, Tailwind CSS, Vite
Backend	Node.js, Express.js, Spring Boot, REST APIs, Socket.IO, JWT
Databases	MongoDB, MySQL
Tools & Cloud	Git, GitHub, Vercel, Render, Cloudinary, Maven
Fundamentals	Data Structures & Algorithms, OOP, DBMS, Computer Networks

PROJECTS

The Silent Co-Driver — Real-Time Driver Stress Analyzer

Tech: React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.IO, Groq LLM API

- Engineered a full-stack real-time application that transcribes driver radio audio and classifies each message as Calm, Stressed, Tired, or Frustrated by integrating the Groq LLM API.
- Delivered live results to a team dashboard over Socket.IO (WebSockets), enabling instant visibility into abnormal driver conditions.
- Designed and implemented JWT authentication, driver-team pairing, audio upload handling, message history, lap tracking, and dashboard REST APIs.

[Live demo](#) | [GitHub](#)

CyberShield — Pre-Payment Fraud Detection

Tech: React.js, Node.js, Express.js, REST APIs

- Built a fraud-intelligence web application that evaluates transaction and user signals during payment processing to flag suspicious activity before a payment completes.
- Structured the system as modular components for real-time analysis and security monitoring, deployed on Vercel.

[Live demo](#) | [GitHub](#)

Vynzo (MegaBlog) — Social Media Platform

Tech: React.js, Node.js, Express.js, MongoDB, Cloudinary

- Developed a full-stack social platform supporting posts, videos, and reels, with RESTful APIs on Node.js/Express and MongoDB for persistence.
- Integrated Cloudinary for scalable image/video storage and stored media URLs in MongoDB for efficient retrieval.

[Frontend](#) | [Backend](#)

ACHIEVEMENTS

- Solved 750+ LeetCode problems, demonstrating consistent practice in data structures, algorithms, and problem solving.
- Participated in 25+ hackathons (including an Adobe Hackathon), building working prototypes in teams under tight deadlines.
- MongoDB certification.
- Participated in technical events and workshops hosted by Microsoft, Azure, AWS, Paytm, MongoDB, and STC.
